

8) Le système à la date t_N vaut :

$$\alpha_{N-1}(S_{t_{N-1}}^{(N)})(1+h_N)S_{t_{N-1}}^{(N)} + \beta_{N-1}(S_{t_{N-1}}^{(N)})S_{t_N}^0 = f((1+h_N)S_{t_{N-1}}^{(N)}) \quad [1]$$

$$\alpha_{N-1}(S_{t_{N-1}}^{(N)})(1+b_N)S_{t_{N-1}}^{(N)} + \beta_{N-1}(S_{t_{N-1}}^{(N)})S_{t_N}^0 = f((1+b_N)S_{t_{N-1}}^{(N)}) \quad [2]$$

[1] - [2] donne :

$$\alpha_{N-1}(S_{t_{N-1}}^{(N)}) = \frac{f((1+h_N)S_{t_{N-1}}^{(N)}) - f((1+b_N)S_{t_{N-1}}^{(N)})}{(h_N - b_N)S_{t_{N-1}}^{(N)}}$$

$(1+h_N)[1] - (1+b_N)[2]$ donne :

$$\beta_{N-1}(S_{t_{N-1}}^{(N)}) = \frac{1}{S_{t_N}^0(h_N - b_N)} (f((1+b_N)S_{t_{N-1}}^{(N)})(1+h_N) - f((1+h_N)S_{t_{N-1}}^{(N)})(1+b_N))$$

9) Le système à la date t_k vaut :

$$\alpha_{k-1}(S_{t_{k-1}}^{(N)})(1+h_N)S_{t_{k-1}}^{(N)} + \beta_{k-1}(S_{t_{k-1}}^{(N)})S_{t_k}^0 = v_k((1+h_N)S_{t_{k-1}}^{(N)}) \quad [1]$$

$$\alpha_{k-1}(S_{t_{k-1}}^{(N)})(1+b_N)S_{t_{k-1}}^{(N)} + \beta_{k-1}(S_{t_{k-1}}^{(N)})S_{t_k}^0 = v_k((1+b_N)S_{t_{k-1}}^{(N)}) \quad [2]$$

Ce qui donne, par un raisonnement analogue :

$$\alpha_{k-1}(S_{t_{k-1}}^{(N)}) = \frac{v_k((1+h_N)S_{t_{k-1}}^{(N)}) - v_k((1+b_N)S_{t_{k-1}}^{(N)})}{(h_N - b_N)S_{t_{k-1}}^{(N)}}$$

$$\beta_{k-1}(S_{t_{k-1}}^{(N)}) = \frac{1}{S_{t_k}^0(h_N - b_N)} (v_k((1+b_N)S_{t_{k-1}}^{(N)})(1+h_N) - v_k((1+h_N)S_{t_{k-1}}^{(N)})(1+b_N))$$
